## High Frequency C3 IGBT Module

**Product Introduction** ()

1.The high frequency series IGBT modules mainly have C3(45mm) package; 2.VCES =1200V, IC= 150A~200A;

3.Mainly used in high frequency applications such as motor drives, servo, etc.;4.The high frequency IGBT modules and other market mainstream products are completely pin to pin alternatives;

5. Environmentally friendly complying with RoHS standards;

Product Features 🕑

1.Tjmax=175℃;

2.Low Vce(sat), suitable for low and medium frequency applications;

3. Freewheeling diode with ultra-fast and soft recovery characteristics;

4. With high short-circuit support current capability (above 10us);

5.Using the insulating baseplate of DBC structure;

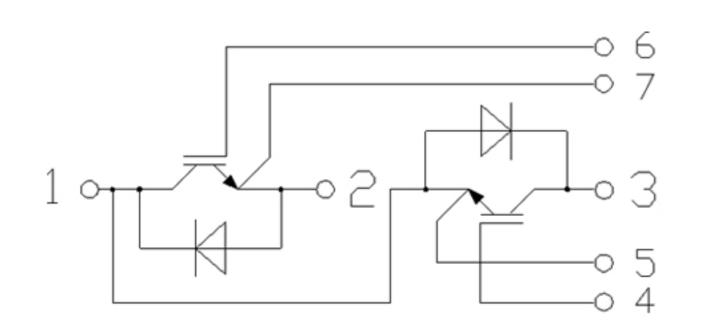

### Electrical Parameters

	÷	

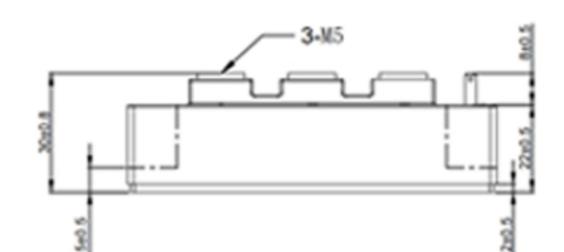

TYPE. NO.	Specification	Package	V <sub>CES</sub>	Structure
MG200HF12TLC3	200A/1200V	С3	1200V	Half-bridge
