

## THREE TERMINAL POSITIVE VOLTAGE REGULATOR

### Description

The YJ78L series are fixed-voltage monolithic integrated circuit voltage regulators. They can deliver up to 100mA of output current. In addition, the YJ78L series integrate internal current limit, short-circuit protection and thermal shutdown, so that they are basically not affected by overload. Therefore, the YJ78L series are widely used in various scenarios, such as on-card regulation for elimination of noise and distribution problems associated with single-point regulation.

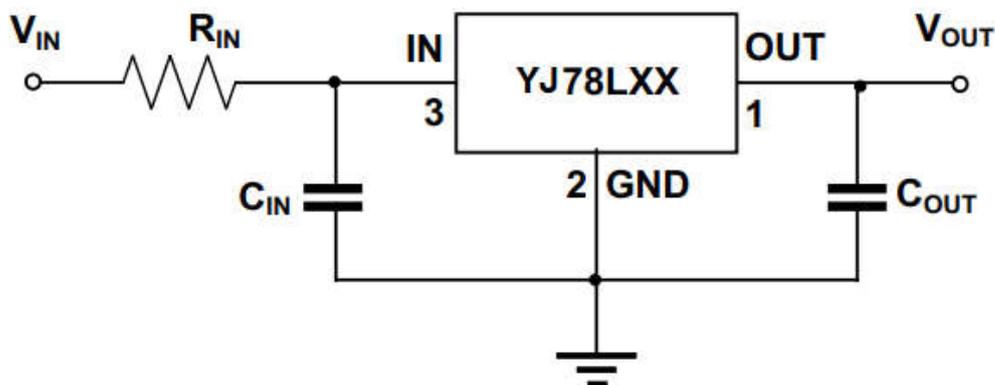

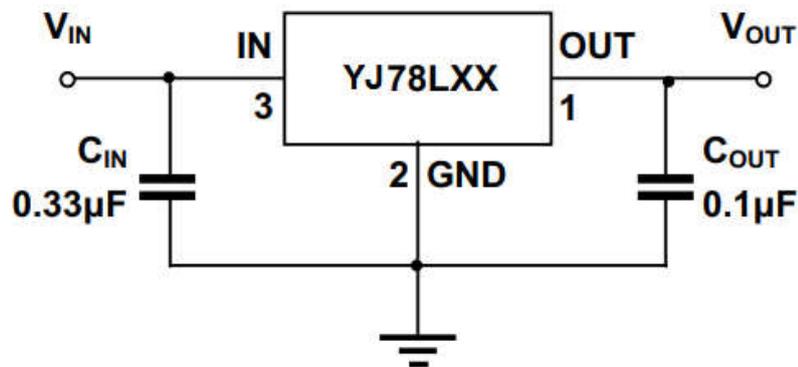

### Features

- Fixed Output Voltage of 5V,6V,8V,9V,10V, 12V,15V,18V and 24V Available.
- Output Current Up to 100mA.
- Thermal Overload Shutdown Protection.
- Short Circuit Protection.
- No External Components.

### Applications

- TV Board
- Air Conditioner
- Vehicle Mounted Radar
- Charging Device
